Teijin to Exhibit at Chinaplas 2023

The Resin and Plastic Processing Business Unit of Teijin Limited will participate in Chinaplas 2023, Asia's largest plastics trade fair. The fair will be held at Shenzhen World Exhibition & Convention Center in China from Monday, April 17, to Thursday, April 20, 2023. Teijin's booth number is 17K91.

This is the 21st exhibition, and our concept will be according to Teijin's Sustainability Initiatives and will introduce our unique environmentally friendly products while demonstrating Teijin's basic policy of aiming to be "A Company that Supports the Society of the Future" and "Contribution to Realize a Sustainable World." In addition, Teijin's other distinctive solutions will be introduced, and new products developed with Teijin's outstanding technological capabilities will be exhibited.

<Our main exhibits>

■ Introducing environmentally friendly polycarbonate resin

Teijin will exhibit to introduce our biomass polycarbonate resin using biomass-derived BPA (raw materials) instead of conventional petroleum-derived materials. We will also present samples of new appearance expressions, such as a speckled laptop chassis that was developed utilizing our recycling technologies.

■ Providing functional resins and materials using Teijin's unique technologies

As a materials supplier supporting the IoT society, Teijin will introduce materials with various properties based on our originality and compounding technologies cultivated over many years.

■ Introducing polycarbonate sheets and films

Teijin will introduce unique products made from our polycarbonate resin and manufactured using our proprietary film-forming technologies. In particular, the decorative films that are developed for automotive interior parts applications have special characteristics of high surface hardness,

chemical resistance, and easier to thermoform than general polycarbonate films. Our decorative films are widely used not only in the automotive field but also in the home appliance field.
